

Arestin Post- Op Instructions

After treatment, patients should avoid eating hard, crunchy, or sticky foods for 1 week.

Do NOT brush or touch the treated area for a 12-hour period.

Do NOT use traditional floss or a floss pick in the treated area for 10 days.

Mild to moderate sensitivity is normal during the first week. If pain, swelling, or other problems continue to occur after the first week notify our office immediately. 404-255-2273
